Veri Story

bridging the gap between dermatology and aesthetics.

STRABERI is Straberi® is a division of Universal Skincare INC. We are dedicated to creating innovative and effective products and devices that are safe for all skin types and conditions at our secure, state of the art laboratory which follows all FDA and Good Clinical Manufacturing Practices.

We founded Straberi with two primary objectives in mind: firstly, to harmonize skincare with a scientific approach, and secondly, to bridge the divide between dermatological aesthetics. In today's beauty landscape, we amalgamate conventional cosmetic science and industrial pharmacy to craft pharmaceutical-grade formulations. This marks a pioneering era in skincare, uniting the realms of aesthetics and chemistry to deliver a meticulously balanced and clinically effective skincare experience.

Our skincare product is only as good as the band behind it. Straberi is led by renowned researchers, scientists, and leading physicians in their field. We believe in delivering clean and sustainable products that are backed by science not by hype.

Veri Values

Straberi mission is to provide powerful regenerative anti-aging and skin clarifying products through sound evidence-based technologies. Straberi scientists pioneered the use of extracts, vitamins, minerals, and peptides with clean beauty technology in aesthetics and dermatology fields.

Cruelty-Free

Cruelty-free products promotes ethical consumer choices, aligns with animal welfare values, and encourages the development of humane testing methods.

Cell-Free

Cell-free products are essential for reducing environmental impact by minimizing resource consumption and waste generation associated with traditional manufacturing processes. It also enables more efficient and sustainable production methods, contributing to a greener and cleaner future.

Pathogen-Free

Pathogen-free products are crucial to safeguard public health by preventing the transmission of harmful diseases and infections. It ensures the safety and well-being of consumers while upholding high standards of hygiene and product quality.

Paraben-Free

Creating paraben-free products is important to protect consumers from potential health risks associated with parabens, such as skin irritations and concerns about endocrine disruption. It also caters to the growing demand for cleaner and more natural product alternatives, meeting the preferences of health-conscious individuals.
